The AI Imperative

Polling Slide

Have you personally used an AI tool (like ChatGPT or Google Gemini) for healthcare related questions

- Yes, often
- Occasionally
- Once or twice
- Never

Polling Slide

What's the biggest challenge your organization faces today

- a. Clinician shortages / burnout
- b. Patient access and wait times
- c. Documentation and billing burden
- d. Patient engagement and outcomes
- e. Obtaining new revenue streams

Demand for Care Is Growing

Aging Adults

1 in 5

Americans will be
65+ by 2030

3x more costs

For older adults compared
to working-age adults

Chronic Disease

3 in 4 adults

have >1 chronic
condition

90%+

Of healthcare expenditures are on
chronic conditions and mental health

Cost of MSK

25% Growth

of surgical spend
by 2032

\$420 bn

Estimated cost for MSK

Capacity Isn't Keeping Up

86,000 Shortage
of Physicians by 2036

*Projected 9% gap leaves millions
without needed care*

[\(AAMC, 2024\)](#)

12,070 Shortage
of Physical Therapists by 2037

*8.4% shortage strains an already
stressed system*

[\(APTA, 2025\)](#)

AI Investment in Healthcare Is Increasing

22% of healthcare organizations have deployed commercial AI, more than double the US Economy.

Share of U.S. Business With Paid Commercial Licenses for AI Applications

[\(Menlo Park, 2025\)](#)

But It's Primarily Invested in the Back Office

- \$1,050M investment in ambient scribes & coding + billing
- \$100M investment in patient engagement

And the Real Spend Is in Care Delivery

**Back Office & IT
Automation Spend**
\$63 BN

Clinical Care Delivery
\$4.9 Trillion of Spend

Dr. ChatGPT Is Inevitable

While the industry focuses inward, patients have already gone digital to address the care gap.

Across generations, AI adoption is broad: 19% of those aged 18–79 have made it a daily habit.

37% of consumers used
GenAI for health in 2024

(Deloitte Insights)

Trust, Not Technology, Is the Bottleneck

But patients haven't *fully* embraced AI for healthcare because they want connection to their providers.

Americans **do use chatbots** for health, but are wary of data sharing.

[Consumer Reports Advocacy](#)

Patients **trust clinicians 4 times more** than technology companies with their health data.

(Deloitte 2024 Consumer Trust Survey)

Percentage of Adults who use AI for Health Activities

AI Adoption Will Follow Trust, Not Hype

Patients won't trust AI to manage their health until it's powered by the clinicians they already trust.

Addressing the Care Gap Together

By embedding AI into their care workflows—triage, engagement, adherence—we can work together to close the capacity gap.

Polling Slide

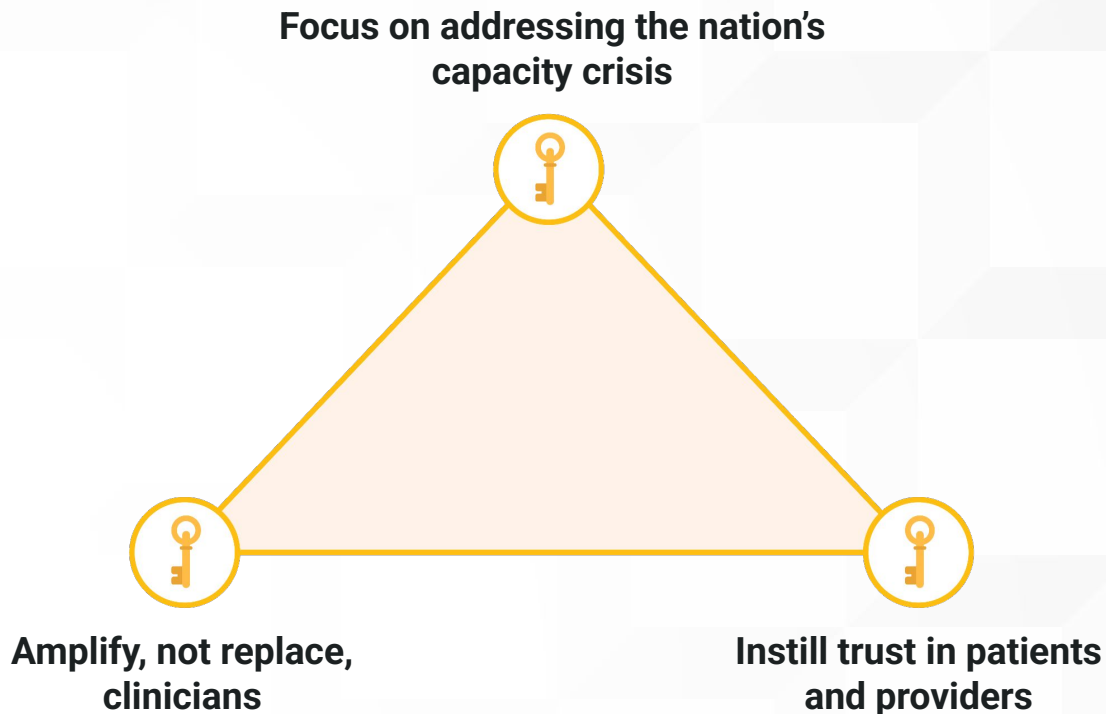

How would you prioritize AI solutions for clinical capacity?

- Streamlining triage and patient routing
- Automating patient follow-up and engagement
- Supporting clinician decision-making
- Optimizing scheduling and workload management

Medbridge's Vision

Our AI Tenants

Our AI efforts will:

One Care: An Integrated Care Ecosystem

One Platform For Every Care Model

Leverage a platform that meets your providers and patients needs today and evolves as you do.

Improve Outcomes For Every Patient

Give your providers the content, features, and reporting they need to deliver exceptional care for every patient who walks through your doors.

Grow Your Business and Brand

Whether looking to reduce cost of care or implement new revenue streams, Medbridge is here to partner with you on your journey to value-based care.

Ways Our Clients Are Currently Using One Care

Boosting Patient Engagement

Clinics pair in-person care with RTM and digital home programs to **keep patients active between visits**.

Automated nudges and progress updates drive higher adherence and retention.

Empowering Upstream Providers

Health systems embed PTs/OTs equipped with Pathways in **primary care, ED, birthing units** to address issues early, like fall risk, **reducing downstream costs**.

Expanding Capacity with AI Triage and Guided Programs

Organizations use **AI-guided triage** to route patients to the right care, digital programs, virtual care, or hybrid care, **freeing capacity and cutting wait times** for primary care and physical therapy.

AI-Driven Care Can Treat Patients Safely and Effectively

When patients have greater access to care, with their clinicians in the digital loop, they get healthier and *everyone* saves money.

Clinical Outcomes

70%

of patients report an improvement in pain at 30 days (PROMIS)

68%

of patients report an improvement in function at 30 days (PROMIS)

40%

average reduction in pain scores

56%

average increase in Physical Function

"Access to care is hugely important for us at Corewell Health. Pathways allows us to get the appropriate level of care to our patients faster."

Don Packard, Rehabilitation Director
Corewell Health

Cost Savings

\$1,268

estimated annual
healthcare charge
reduction

for patients with Low
Back Pain after just
1 month on Pathways

\$1,463

estimated cost
reduction

by redirecting 94% of MSK
patients to PT-led
consults vs. PCP
appointments

"We have patients with barriers to care like high copays or deductibles. Pathways allows us to provide accessible service to those patients where we couldn't before."

Rebecca Straseskie, Virtual Therapy Regional Director
Sentara Health

Patients Like AI-Powered Care

Patients and users are providing positive feedback on their experience and outcomes.

Patient Adoption & Satisfaction

86%

of patients indicate being satisfied with their experience

84%

of patients activate their account

"I can actually pick up my two year-old granddaughter again.

It's definitely improved my mood and my back problems are not bothering me."

Mary, WI, 66

"I definitely feel better.** I can feel an increase in flexibility and a decrease in back pain... **I feel like I am more able to do things, even just bending down to pick something up off the floor."

Paula, IL, 68

Medbridge User Study

(November, 2024)

Medbridge conducted a paid study with a small group of older adults to better understand the user experience.

Feedback and results were **overwhelming positive**.

"Now I feel like I can do something about my back pain.

I can be proactive and not just endure it."

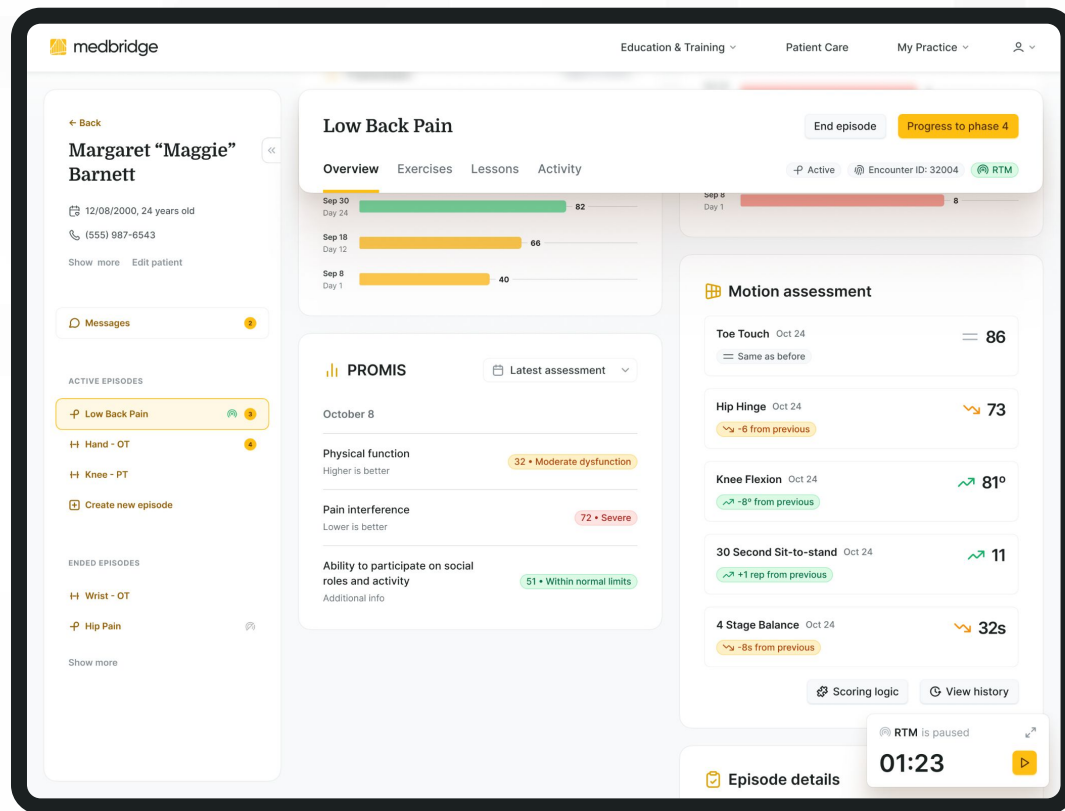

Mike, FL, 73

*"It's almost like **you have a teacher in front of you. It's much better than when a PT gives you a piece of paper when you leave** and you never look at it again"*

Jin, TN, 70

Summary

The patient reports a concerning increase in knee pain. This is a worrying trend compared to the previous downward trend in pain scores. There is limited data available to assess changes in motor function due to the decrease in platform engagement.

 The summary above is generated by artificial intelligence. While we strive for accuracy and usefulness, AI-generated insights should never replace professional judgment.

Low Back Pain
